[Buy Minnan's !](#)

Hi There, Welcome to Minnan, a Responsive Business!

Minnan manufactures single phase, three phase and separated phase transformers in a variety of voltage classes and MVA ratings for transmission & distribution substations, generation applications as well as industrial applications such as arc furnace. Our transformers can handle voltages up to 765 kV, with ratings up to 2,400 MVA per bank. We provide both outdoor and indoor (including underground) installations. Our transformers meet a wide variety of domestic and international standards, including ANSI, IEEE, NEMA, JIS, JEC, KS, ESB, BS, and IEC.

Power transformers provide 20 years of reliable operation

Minnan's total quality commitment to our customers is demonstrated by providing the highest quality product, competitively designed and fairly priced, with on-time delivery. We achieve these high quality levels through our integrated quality assurance program. This level of experience allows Minnan's quality assurance and reliability to exceed those of our

competitors.

Customers worldwide can securely rely on the quality and reliability of our products.

Minnan supports our customers' goals with high quality products. From design to assembly, testing and installation, the customers' requirements are set as the standard, and goal for Minnan to achieve and exceed. Minnan operates an around-the-clock temperature, moisture, and dust-controlled clean room in its manufacturing process to contribute to the manufacture of a high quality power transformer.

Support. You buy it, we provide it. Excellence all the way!

Minnan maintains a team of expert technical service professionals available to meet all of your Transformer, Circuit Breaker and GIS installation and service needs. Our Service Professionals are available to address your needs, day or night.
